Random Number Generator Certificate

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) by SPADEGAMING and found that the RNG complies with the relevant standards.*

Software provider: Spadegaming
Software provider URL: www.spadegaming.com

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has also evaluated scaling for Slot games.

The scaling tests were conducted on large enough samples to give the calculations sufficient statistical power. iTech Labs has found that the number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

* The RNG was tested according to Malta LGA Remote Gaming Regulations.

Disclaimer.
While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
